Syria Emergency Water Security and Resilient Services Project

ABSTRACT

The project aims to restore bulk water and wastewater infrastructure in priority areas and enhance resilience to climate risks in Syria.

PROJECT COMPONENTS

Component 1: Restoring and Safeguarding Water Supply Services.

Restoration of critical water supplies in priority areas, e.g. Ain Al-Zarqa bulk water supply system, Upper Orontes Water Treatment Plant, and provision of emergency equipment and supplies.

Component 2: Component 2: Rehabilitating Wastewater Infrastructure.

Rehabilitation of Adra Wastewater Treatment Plant and preparation for the rehabilitation of the Sheikh Saied Wastewater Treatment Plant in Aleppo

Component 3: Enhancing Water Resources and Resilience.

National Dam Safety Program , Water and Climate Information and Control Center, support for Transboundary Waters Cooperation

Component 4: Governance, Monitoring and Management.

Consultancy services for project management, capacity building activities, supporting regulatory functions and monitoring the quality of services, and an internship program
