RLF – Mykolayiv Emergency Water Project

ABSTRACT

The Project is aimed to rehabilitate the aging water supply and treatment infrastructure of the city of Mykolayiv. The expected results are the restoration of the City's drinking water supply, the reduction of water losses, improved quality of supplied water, energy savings and a reduction in green house gases.

"Mykolayivvodokanal" is a municipal enterprise responsible for the provision of water supply and sewerage services to the City of Mykolayiv. It is wholly owned by the City.

PROJECT COMPONENTS

1. Rebuilding of preliminary treatment unit at Dnipro water intake, including installation of new microfilters
2. Replacement of rotating screens at the Dnipro water intake preliminary treatment unit
3. Renovation of pumping station 1 including building repairs, replacement of pumps and control equipment
4. Replacement of priority steel pipelines within the water distribution network
5. Renovation of pumping station 0, including building repairs, replacement of pumps and control equipment
6. Renovation of electrical transformer substation

RLF – Lutsk District Heating – Phase II

ABSTRACT

By financing the modernization of the district heating (DH) system in the City of Lutsk the Project will contribute to preserving and improving the livelihoods of the residents by ensuring reliable access to DH services, which have been negatively affected by the ongoing war.

The District Heating Company “Lutskteplo” is a municipal district heating service provider wholly owned by the City of Lutsk.

PROJECT COMPONENTS & TASKS

1. Replacement and interconnection of DH networks along with optimization of their diameters
2. Installation of heat pumps and biomass-fired boiler(s)
3. Installation of dispatching and monitoring system (SCADA)
