Olga Mitskevych

Increasing energy efficiency in the transmission sector (integration of the UKR electricity network into the EU interconnected network) V

ABSTRACT

The aim of the project is to make a significant contribution to a stable and efficient power supply in the Ukrainian power grid. The measures aim to repair, rehabilitate and protect important substations and to provide important materials and accessories.

PROJECT COMPONENTS

Component 1: rehabilitation of transformer stations in Ukraine in order to secure the energy supply in the short and medium term, to reduce energy losses in the power grid

Component 2: connection of the Ukrainian power grid to the European interconnected grid.

PROCUREMENT INFORMATION

Procurements will be conducted by the EIB Borrowers/Promoters in accordance with the Guide to Procurement for the contract under the EIB-financed project.
