UPGRADE OF DISTRICT HEATING SYSTEM IN VINNYTSIA

ABSTRACT

The project aims at improving district heating system in the city of Vinnytsi, including:

- interconnection of the currently separately operated district heating networks supplied from boiler houses into one district heating network and replacement of existing district heating pipelines in worst condition
- installation of Individual Heating Substations (IHS) to enable demand driven operation of the interconnected district heating network

PROJECT COMPONENTS

Component 1: supply and reconstruction of district heating pipelines including main pipelines and distribution pipelines

Component 2: supply and installation of individual heating substations with automated control

Component 3: supply and installation of new network pumps

PROCUREMENT INFORMATION

Current active procurement notices:

“Supply of pre-insulated pipes and fittings with additional services”

(Supply of about 3000 m (trench length) of pre-insulated pipes with fittings and additional services, which facilitate interconnection of the currently separately operated district heating networks. The quantities are estimated at about 6 300 m pipes plus fittings.)

- Deadline for active procurement notice – 21 November 2024
